

Pengo 3-Drum Hydraulic Puller

# Transmission Construction Industry Leader Retires and Sells at Absolute Auction!

S.E., Inc. has been providing the very best in Transmission Powerline Construction for over (40) years throughout the Western United States. Brothers Mark, Steve, David, and Craig Sorenson have decided to retire and pursue other interests. Everything in the auction is owned by S.E., Inc. and will positively sell to the highest bidder without minimum or reserve!

S.E., Inc. has hired Hunyady Auction Company to conduct their liquidation. Hunyady Auction Company is celebrating their 35th year in business and specializes in liquidation auctions of electrical construction companies plus many other industries.

Transmission and Distribution (T&D) professionals have a unique opportunity to acquire high-quality equipment at the upcoming auction hosted by Hunyady Auction Company. Scheduled for June 10th, 11th, and 12th, 2025, this comprehensive event will take place across three locations: Deaver, Wyoming; Nunn, Colorado; and Quartzsite, Arizona.

## WHY T&D PROFESSIONALS SHOULD BE INTERESTED

This auction represents a significant opportunity for T&D professionals to enhance their operational capabilities. With a wide array of specialized equipment available, attendees can expect to find assets that align with their specific needs, potentially at more competitive prices than purchasing new. The variety and quality of equipment on offer make this event particularly appealing for those looking to expand or update their resources.

## BENEFITS OF PARTICIPATING

One of the key benefits of participating in this auction is S.E., Inc.'s decades long, exemplary reputation for well maintained equipment, up to date fleet, and work ethic. Auctions often provide equipment at prices lower than retail, allowing companies to maximize their budgets and acquire high-quality machinery without overspending. Another advantage is immediate availability. Unlike ordering new equipment, which can involve long lead times, purchasing at an auction enables businesses to integrate their acquisitions into ongoing projects right away, minimizing downtime and delays. Additionally, the auction offers a diverse selection of equipment, giving attendees the opportunity to find multiple assets in one setting, making it a convenient and efficient way to source specialized T&D equipment.

## WHO SHOULD ATTEND

The auction is ideal for:

- **Utility Companies:** Seeking to upgrade or expand their T&D infrastructure.
- **Contractors:** Specializing in power line construction and maintenance.
- **Equipment Rental Firms:** Looking to diversify their inventory with specialized T&D machinery.
- **Maintenance Teams:** In need of reliable equipment for routine operations.
